

AWERY  
AVIATION SOFTWARE

# ULTIMATE AVIATION BUSINESS MANAGEMENT SOFTWARE

FOR COMPANIES OF ANY SIZE

APPLY FOR FREE TRIAL [🌐 www.awery.aero](https://www.awery.aero) [✉ sales@awery.aero](mailto:sales@awery.aero) [☎ +971 50 173 6044](tel:+971501736044)

# AWERY ERP

- A complete integrated web-based extremely flexible and customizable platform developed in close cooperation with aviation professionals.
- Manages sales, operations, finance, and HR.
- Increases productivity, reliability, and efficiency.

## KEY FEATURES

-  Flexible connectivity to other systems for data exchange
-  Transparent information flow within the company
-  Blazingly fast performance
-  User-friendly interface
-  Bank-grade security with advanced access policies
-  Support of Multi-Company (Branches) configuration
-  Customer service tools
-  Mobile apps

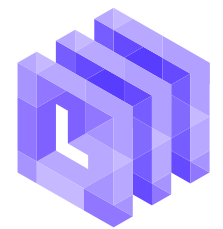

## SYSTEM PROVIDES

-  An integrated real-time view of core business processes accessible from any place in the world
-  Up-to-date management reports and data for analysis, automated documentation
-  Powerful CRM, informational database, source for tactical and strategic planning
-  Integrated mailing/messaging system with templates support

## HOW WE HELP BUSINESS

-  Improve business processes and visibility
-  Reduce human intervention and prevent multiple errors
-  Save time and efforts
-  Assist in decision making
-  Boost profitability

# DOCUMENTS LIBRARY

- A web application for documents distribution and control within the company.
- Allows automating processes related to the documents circulation, revisions control, managing documents approval, producing status reports, sending reminders and notifications.

## KEY FEATURES

A unified database for storing and distributing documents

Transparent document flow

Covers compliance requirements for documents distribution

Bank-grade security with advanced access policies

Key document formats supported

User-friendly interface

Mobile support on any platform

## SYSTEM PROVIDES

A framework for documents and their revisions storage and distribution

An electronic confirmation of documents receipt and acceptance

A tool for document classifications

Handy distribution lists

Draft, active and obsolete document statuses, auditors approval

A tool for document access management and signature status control

## DEPLOYMENT OPTIONS

### CLOUD-BASED — AWERY HOSTS

- Hosted, supported, and managed by Awery 24 hours, 7 days a week.
- Monthly license fees per user.
- No hardware related and IT support costs.
- Perfect solution for small and midsize aviation businesses.

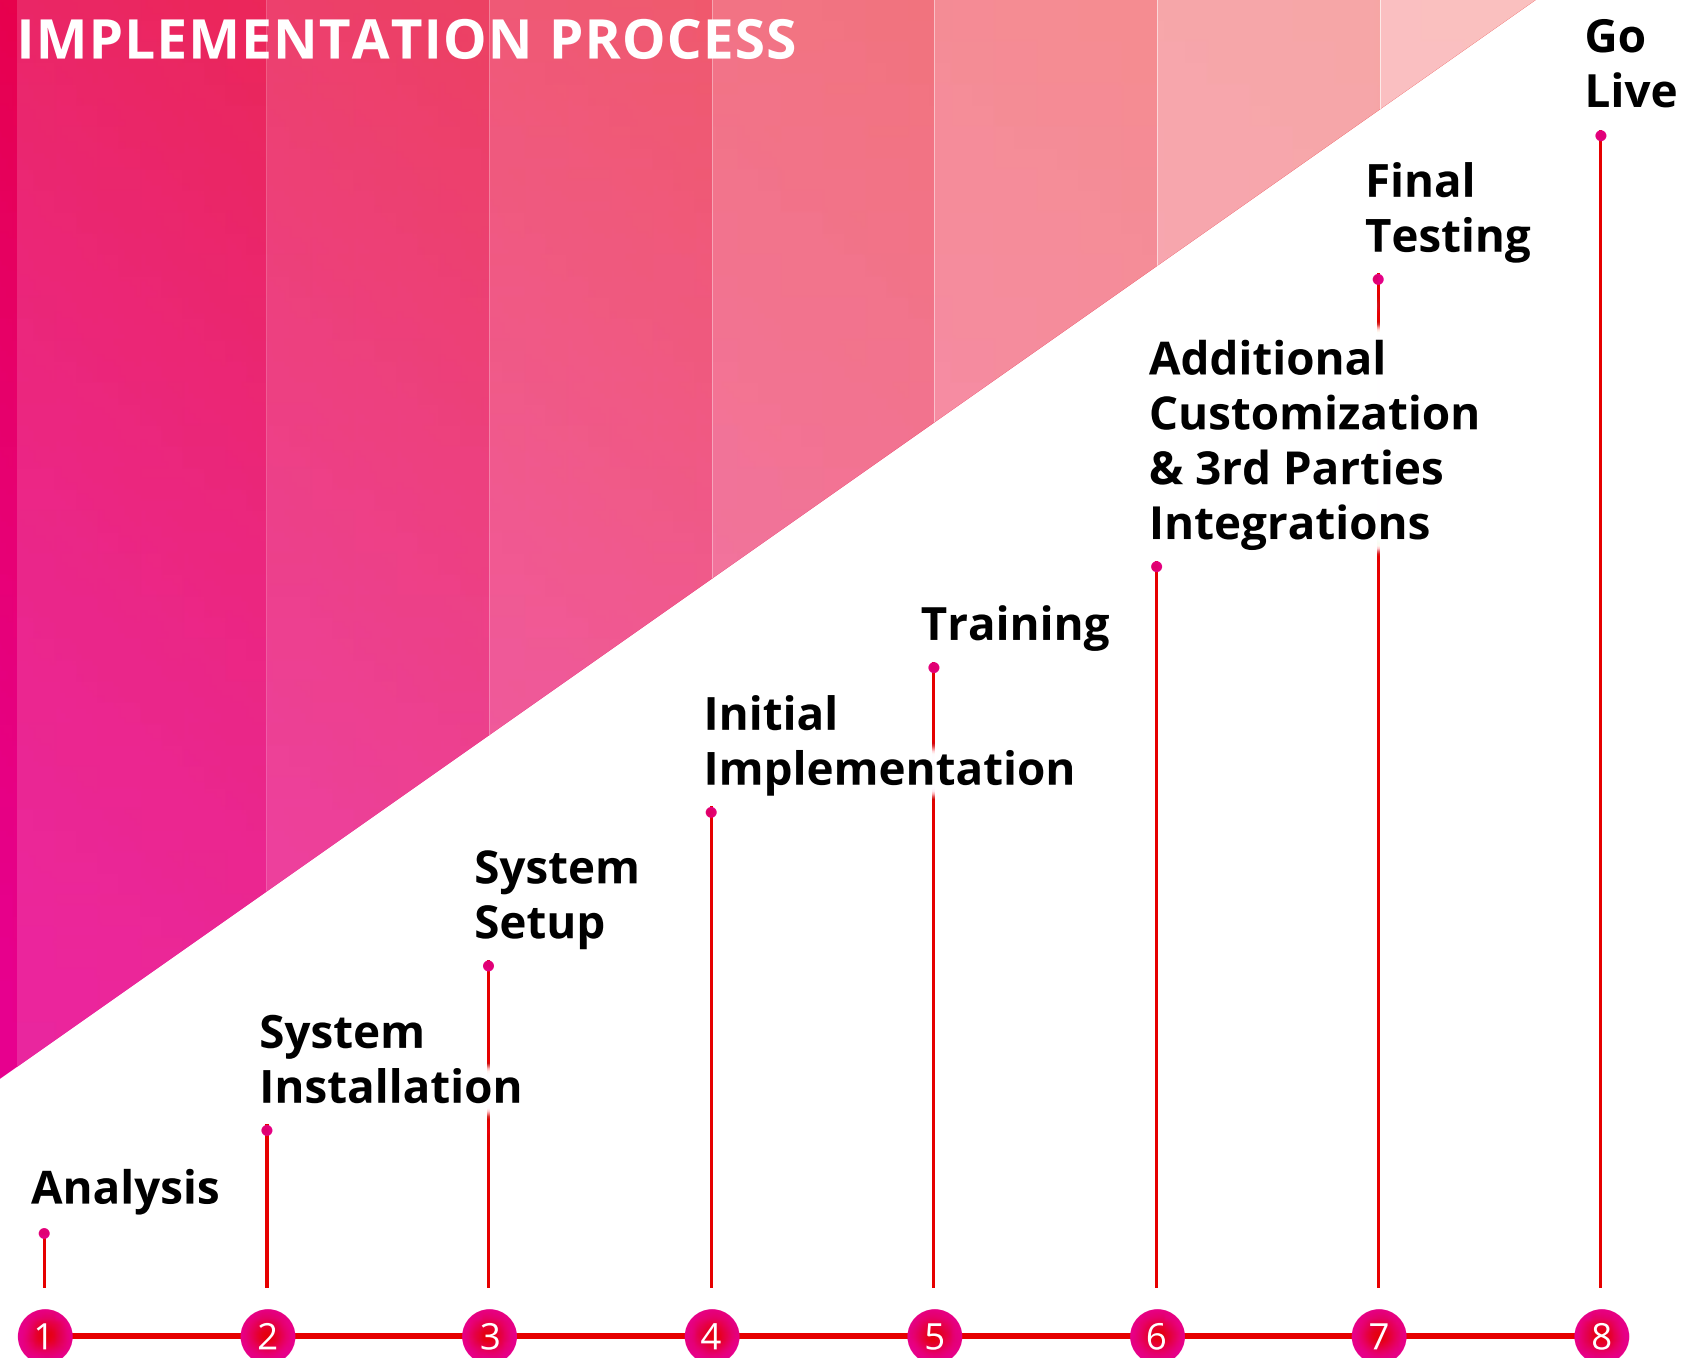

### HOSTED — CUSTOMER HOSTS

- System is hosted on customer server – in data center or in customer's local IT infrastructure.
- Goes with Database License and 24/7/365 Awery support.
- Best fits big aviation players with sophisticated IT infrastructure.

## IMPLEMENTATION PROCESS

## SOLUTIONS

**Aviation business executives** manage a large amount of complex data on a daily basis in order to properly employ and control their resources as well as serve their customers efficiently.

**Awery ERP provides** all the required tools, reminders, templates and reports in one place integrating business and financial operations across various departments, covering the entire workflow and supplying a multifunctional platform for day-to-day business activities.

COMMERCIAL AIRLINES

CARGO AIRLINES

PRIVATE OPERATORS

FREIGHT FORWARDERS & CARGO AGENTS

AVIATION SERVICE PROVIDERS

AIR CHARTER BROKERS

ON BOARD COURIERS

# AVIATION SERVICES MANAGEMENT

- Automated flight services requests control.
- Services requests processing and management: fuelling, handling, permits, flight plans, etc.
- Preferred vendors management based on priority, service type, customer requests, flight category and country/location.
- Sale and cost rates database for services.
- Revenue and costs calculation, accounting processing/allocation.
- Automated messages generation based on Text, HTML and SITA templates.
- Web and mobile service status tracking/request application for the customers.

# CUSTOMER AVIATION SERVICES PORTAL

- Services list with statuses and details.
- Services change log.
- Brief printing.
- Full flight information.
- Fleet details and documents.
- Company details setup.
- Users list.
- Android and iOS app.

## FUEL PRICING MANAGEMENT

- Dynamic price calculation per day.
- Platts and fuel currency rates database.
- Offers and price lists generation for customers.
- Files and correspondence attachments to prices.
- Internal and external notes, notes for supplier per airport, fuel information per country.

## COMPLIANCE & AUDITS

- Internal/external compliance and safety audits schedule.
- Interactive audits calendar.
- Audits progress tracking.
- Audits findings control with advanced filters.
- Audits closing and reporting.
- Documentation and files attachments to audits and findings.
- Android and iOS app.

## CHARTER CALCULATION

- Filterable quotes/calculation database.
- Connection to flight planning software for precise route data, such as flight time, fuel consumption, navigation charges, based on aircraft type and weather.
- Advanced rates management for all types of costs.
- Instant converting of estimations into commercial offers.

## EMPTY LEGS CONTROL

- Advanced analytical search to match enquiries/flights with empty legs.
- Unique empty legs numbers, statuses, sources, availability dates.
- On-map representation of empty legs combined with flights and enquiries.
- Linking to existing enquires/flights.
- Live database with the option to post empty legs to website or distribute by emails.
- Automatic alerts on available empty legs.

## CHARTER QUOTATION

- Automated process to speed up input of enquiries, send requests to operators, quote customers, make flight briefing, generate charter agreements, reports, summary reports, etc.
- Segregated filterable database of enquiries
- Advanced support databases: operators, fleet, aircraft types, airports, countries, etc.
- CRM features: customers/suppliers with contact details, requests, activities, tasks and messaging history.
- Automated message generation to send requests to operators.
- Response from operators: schedule details, charter price details, additional services price details.
- Response from customers: won, lost with reason, fixture details, fixture schedule, fixture reference number.
- Empty legs enquiries management, operator's empty legs connectivity through API.
- Interactive world map with combined data from enquiries database and empty legs with analytics.
- Charter calculation that allows cost calculation per sector using either rates database or previous calculations.

The screenshot displays a flight charter software interface. On the left, a 'Flight Quotation #1' is shown for the date '27 April 2017'. The company/contact is 'ARAMEX, Hendrik Lorentz'. The itinerary details a flight from Dubai (DXB) to Frankfurt (FRA) on Thursday, 27 April 2017, departing at 13:00 and arriving at 18:00, with a flight time of 07:00. The aircraft options section lists 'Option 1: Gulfstream 550 Ultra Long Range Heavy Jet' with a category of 'YOM/Last Refurbishment: 0' and a baggage capacity of '6.30 cbm'. Below this, a map of Europe shows a flight route from Dubai to Frankfurt, passing through the UK and Germany. The right side of the interface shows a detailed view of the flight, including a table of costs and a list of aircraft options. The table lists two options: 'ACME Airlines' (Gulfstream 550) and 'Rotana Jet Aviation' (Gulfstream 450). The bottom section shows a list of aircraft options with columns for aircraft type, reg. no., catering, seats, baggage, max weight, owners, year, refurb, and cost. The 'Rotana Jet Aviation' option is highlighted.

## CRM

- Customers/suppliers/leads management with advanced multiple contacts, types, statuses, extra fields management.
- Activities control and linked tasks history, documents upload.
- Credit terms.
- History of operations, accounting integration, reporting.

## MAIL LINK

- Mailbox import with attachments to Awery ERP.
- Messages database with statuses, labels and advanced filters.
- Messages auto-linking to threads, customers, quotes, tasks, activities, flights, services, AWB's.
- Messages history in customer/supplier profiles.

## INFO & RATES DATABASE

- Aircraft Types: VIP, Commercial, Cargo, Rotary Wings; categories, full data (MTOW, cabin dimensions, facilities, speed), photo gallery, list of aircrafts.
- Airports: longitude, latitude, time zone, runway details, tarmac details, terminals details, procedures, restrictions, permissions.
- Countries: region, sanctions, list of airports.
- Distances: flight distance, entry points, weather codes, notams, flight/block time for reporting.
- Contacts: all companies contacts grouped by contractor or company, extended search.
- Rates: currency rates, customer specific rates, services rates, shipping rates, fuel rates, fixed expenses for airports, flight cost center, etc.
- Other data selector editors: variable pick lists, services, revenue, expense types, etc.
